

## NON-SURGICAL FACE LIFT INFORMATION & AFTERCARE

For years one has dreaded to look like a haggard old bag and it has always been a matter of pride to look youthful. Previously the only way to reverse the signs of ageing was cosmetic surgery, but today due to the advances in technology many alternatives are available to maintain this youthful appearance. Non-Surgical Face Lift is one such treatment that helps to delay and prevent the signs of ageing.

### **What is Non Surgical Face Lift?**

If we abide by the etymology of the word, the purpose of a lifting treatment is to lift the skin and adjacent structures. In this sense, it must be understood that lifting is a technique for the prevention and treatment of the ageing process, flaccidity and wrinkling of the skin.

As one gets older the muscles of the face and neck begin to sag and fine lines and wrinkles begin to appear on the face. Non Surgical Face Lift uses a micro-current to tone the muscles of the face and stimulate the blood circulation thereby producing the desired lift.

### **What are the benefits of this treatment?**

- Improves muscle tone and prevents sagging
- Reduces the fine lines and wrinkles
- Helps to firm and reduce the bags around the eyes.
- Prevents sagging of the neck
- Moisturizes the skin by increasing collagen formation
- Makes the skin look fresh and radiant

All the above benefits lead to greater self confidence.

### **How is this treatment done?**

This technique basically consists of stimulating the facial zone using certain manipulations and passing a microcurrent (of very low voltage) whose parameters are similar to the physiological nerve impulses. Skin Essentials uses the CE approved machine. This machine generates a series of rectangular and trapezoidal microcurrents which are transmitted to the surface of the skin in two different ways by way of some electrodes dampened in a conduction product and with specific anti-ageing properties. The specialist works on the zone to be treated with this pair of electrodes, using specific manipulations and a deeply studied method.

# PERMANENT HAIR REDUCTION & ADVANCED BEAUTY CLINICS

**During the treatment you may experience the following**

- Slight tingling sensation
- Tightness of the skin.

**How many treatments does one need?**

A course of at least 10 treatments must be undertaken for good long lasting results. Programs are generally made depending on each person's requirement and the condition of the skin. Maintenance treatments will help prolong the results for 5-10 years.

**How is this treatment better than other treatments?**

- It is painless
- Safe
- Inexpensive
- No surgery or injections involved
- No down time (you can go to work straight after the treatment)

**Can this lifting treatment be done on other parts of the body?**

Yes, this treatment is also effective for the lifting of the bust and buttocks.

**For further information on the procedure, contra-indications for the procedure and after care kindly contact the inclinic doctor.**
